

Pool Slide Spray Kit

Diagram	DESCRIPTION	QTY
A	Flexible tube	1
B	Hose connector	1
C	Gasket seal	1
D	Center connector/manifold	1
E	Union bolt	1
F	Wide spray nozzle	1
G	Narrow spray nozzle	1
H	Plastic nuts	4

Swimming Pool Slides
swimmingpoolslides.net

The Hose Connector

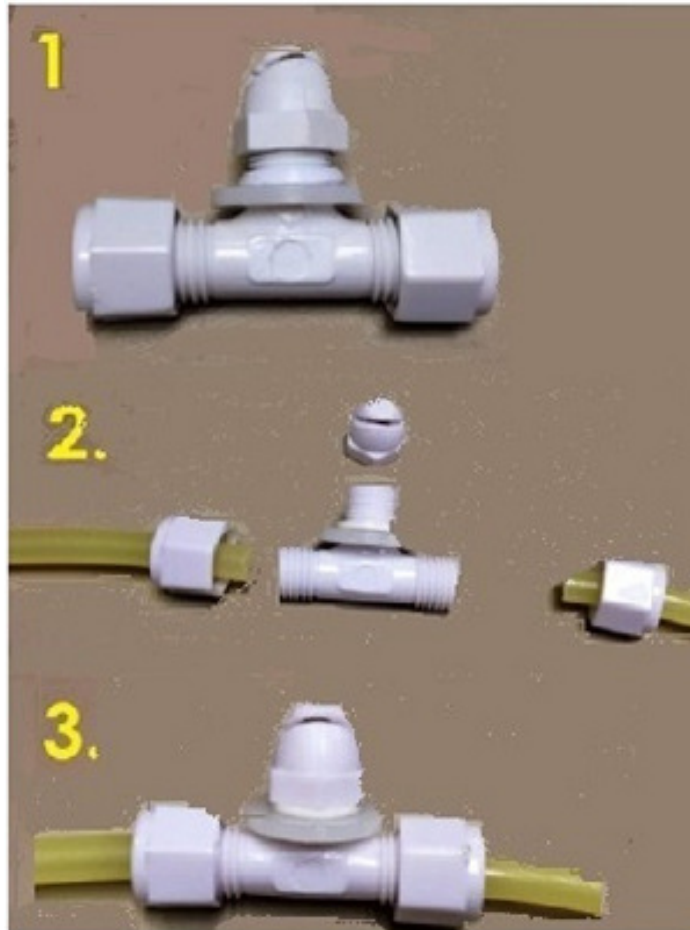

1. Hose connector, gasket seal, and a plastic nut.
2. Insert the gasket seal into the hose connector.
3. Take one end of the tubing and insert into a

plastic nut so the threading faces away from the tube.

4. Screw the nut with tube attached to the hose connector.

* The hose connector will screw onto a standard garden hose.

Center Connection and Nozzle

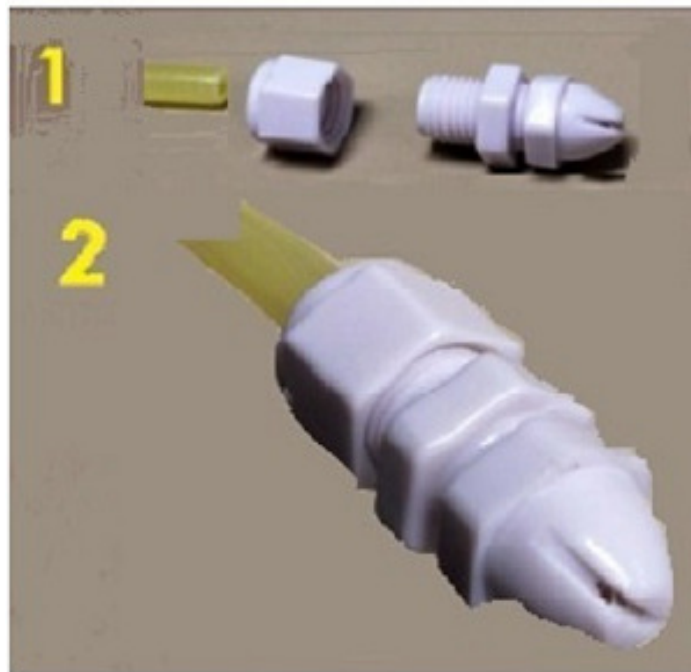

1. Fully assembled center piece.

2. Carefully cut the tubing at a length that will correspond to your slide's lower water spout. Insert tubing into plastic nuts.

3. Screw plastic nuts and wide spray nozzle onto center connector.

* See page 6 for instructions to differentiate wide and narrow spray nozzles.

Main Nozzle

1. Insert tube into plastic nut. Screw narrow water nozzle onto union bolt.
2. Fully assembled main nozzle.

How differentiate Wide and Narrow Spray Nozzles

- Left:** Wide spray nozzle.
Has the horizontal slit.
- Right:** Narrow spray nozzle.
Has the vertical slit.
